

DATRON Service

DATRON guarantees the highest efficiency during machine operation, even years after you have purchased the machine. And this promise holds true worldwide! With our practice-oriented familiarisation and training programmes, you can make use of the full potential of our machines - right from the beginning! The latest diagnostic tools and the extensive know-how of our staff ensures that everything runs smoothly in your production environment. Our sophisticated spare parts service and customised maintenance programme significantly minimise downtimes. When you buy a DATRON system, you get more than just a machine with a control system: You will get a team of experts who are there to provide comprehensive support to you!

- Customer service and consulting support: professional - quick - on the spot - low-cost
- Commissioning, training, and application support
- Hotline support and remote maintenance
- Spare parts service and repairs machine maintenance with tailored maintenance contracts, machine overhaul and retrofitting

About DATRON

DATRON offers products and services for production and automation. The common feature of our products is the high level of innovation and the strong orientation toward customer benefit. DATRON products are „problem solvers.“ Due to the practical layout of the overall systems and the technologically excellent characteristics, our products can radically improve your production or automation processes. Thanks to consistent modularisation, DATRON can offer standard solutions which can be configured to a great extent to meet individual customer requirements. In addition, we support our customers with a wide range of services.

Contact data:

CNC machining systems:

Jens Reitz

Customer Service

DATRON CNC Machines

Powerful machining systems for effective and profitable cutting of small parts, extrusions, front panels and large-format aluminium plates. Speeds of up to 60,000 rpm ensure high manufacturing speeds and excellent results. Modular system solutions lead to perfect custom-made machines — at the low price of a large-series product.

- Burr-free machining - therefore, time-consuming refinishing is not necessary
- Surface sensing with 3D probe
- Simple handling and short set-up times due to integrated clamping solutions
- Sophisticated and practice-oriented accessories for the highest manufacturing quality

DATRON Dispensing Systems

DATRON offers fully automatic dispensing systems as an alternative to conventional sealing and bonding systems. These machines stand out due to their high dynamics and volume consistency as well as short cycle times. The highest possible precision and simple handling, combined with highly efficient programming and powerful accessories, ensure perfect dispensing quality.

- Quick and dynamic machines with high positioning accuracy
- Volumetric, precise dispensing head, software-controlled and independent of pressure, speed and viscosity
- Specially developed dispensing accessories guarantee an optimal overall solution

DATRON Mini-Tools

Innovative HSC milling and engraving tools for even more success in your production! For over 18 years, we have been developing, testing and producing high-precision carbide tools. DATRON carbide tools for CNC-controlled milling, drilling and engraving are designed to provide maximum profitability.

- DATRON tool technology - „Made in Germany“
- Many years of experience in quick and profitable quality manufacturing of high-precision tools
- Sophisticated technology for CNC-controlled manufacturing
- Reliable, optimised tools for particularly high process stability
- Constantly high level of performance of the tools due to testing on our own milling machines
- Simply order online or by fax, phone or E-mail, and the tools will be delivered without any delay. We normally deliver within 24 hours.

Now you can also order online at www.mini-tools.de!

Product lines

Powerful	M10
Precise	M7, M8
Profitable	M25, M35
Large-format	ML, M8XL

Product lines

Stand-alone machines	PR0400, PR0500, PR1750
Semi-automated machines with rotary indexing table or changing table	
In-line dispensing systems	IR0300, IR0500, IR1750

Top DATRON products:

- Thread mills
- Radius mills
- Single and double flute end mills
- PCB milling cutters
